

SEAPRO TRADE

Fish, Seafood & Vegetable Processing

**ACCRA & SEKONDI -HACCP PLANT PROJECTS
PRESENTATION - HIGHLIGHTS**

PROJECT FACT SHEETS

Introduction:

- Seapro Trade is currently undertaking a US\$3 million expansion drive of its existing production facility in Accra North (top-right photo). A proposed second facility at the Accra West site (down right photo) now under construction will compliment the Accra project's planned status as a free zones enterprise.

Accra North Site:

- The Accra North site when completed will comprise a 3-tier production facility for value-added fish and vegetable products in fresh chilled, frozen and dry forms for export to Japan, UK, EU and the US markets. The installed production capacity will have a daily throughput of 15MT.

PROJECT FACT SHEETS

Accra West Site:

- The proposed Accra West site is a bulk refrigerated warehouse for frozen fish and seafood products. It will have a combined storage capacity of 300MT of frozen products. There will also be an installed plate freezer and packing room for freshly landed pelagic with a daily throughput of 6MT.

Value-Added Products:

- The as a Free Zones facility is focused on the production of value-added goods for exports. The product lines include raw, breaded & battered, marinated and cured forms. This will require the installation of state-of-the-art processing machinery and equipment.

PROJECT FACT SHEETS

Sekondi HACCP Plant Project:

- This is a proposed US\$20 million project (right photos) to be established at the ABS Fishing Harbour in Sekondi. The facility will be a sequel to the Accra project and will be a Public-Private-Partnership (PPP) collaboration involving Seapro Trade, and other Ghanaian / international equity partners.
- The project partners are mobilizing resources in the form of equity & debt portfolios, technical liaison, procurement, marketing & distribution networks. The completed project will serve as a bulk off-taker for industrial vessels calling at the port.

PROJECT FACT SHEETS

Ghana Investment Forum (GIF) - Japan:

- As part of an ongoing market development and access drive Seapro Trade participated in the GIF in Tokyo, Japan in May 2016. The GIF was a presidential investment roadshow of the Ghana Government (GoG) to promote collaboration between Ghanaian and Japanese businesses.
- The B2B session of the GIF produced significant opportunities for Seapro Trade in terms of investment / trading collaboration, technology deployment and market access development pathways. The GIF in effect introduced new dimensions in the ongoing Accra project development schedule.

PROJECT FACT SHEETS

JETRO & Foodex Japan 2017:

- A B2B follow-up at the GIF in Japan was the recommendation of Seapro Trade to the Japan External Trade Organisation (JETRO) by the Ghana Mission in Tokyo. Seapro Trade executives were invited on appointment to the JETRO head quarters in Tokyo for deliberations.
- After a screening and sensitization workshop Seapro Trade has been shortlisted to participate in the Foodex Japan 2017 Exhibition in Tokyo (7 – 10 March). This is a significant feature in market access.

PROJECT FACT SHEETS

Equator Japan LLC & Tsukiji Fish Market :

- Seapro Trade established a collaboration with Messrs Equator Japan LLC during the B2B session of the GIF in Japan. The two parties agreed to develop synergies towards the overall development of Seapro Trade business for mutual benefit.
- Messrs Equator Japan LLC introduced Seapro Trade executives to the activities of the Tsukiji fish market in Tokyo. Tsukiji is an embodiment of the fish & seafood industry in Japan and is the largest fish market in the world. A close-up observation revealed insights into the structure and intricacies associated with the Japanese market.

PROJECT FACT SHEETS

Mayekawa Refrigeration Co. Ltd:

- Another feature of the B2B session of the GIF in Japan was linkages started between Seapro Trade and Mayekawa Refrigeration Co Ltd – a leading global refrigeration systems design-suppliers.
- The collaboration with Mayekawa has resulted in Mayekawa's appointment as the refrigeration systems designer and prospective equipment and machinery suppliers to the Accra project.
- Mayekawa has also shown keen interest in the future planning and development of the proposed Sekondi HACCP Plant project.

PROJECT FACT SHEETS

Seapro Trade Visits- Mayekawa Moriya Plant:

- A post GIF, Tokyo activity was the opportunity offered by Mayekawa Refrigeration to Seapro Trade executives to visit its world class production facility in Moriya, Japan.
- The guided factory tour of the Mayekawa Moriya plant and follow up technical meetings at its head office in Tokyo set in motion a lasting collaboration between the two organisations with Mayekawa introducing a number of interventions aimed at placing Seapro Trade in a pole position in its infrastructural development effort.

PROJECT FACT SHEETS

Mayekawa Engineer Visits Seapro Trade:

- Mayekawa has made two follow-up trips to Seapro Trade Accra project site to inspect and reconcile specifications relating to the ongoing design of the facility's refrigeration needs in the Accra project.
- The two visits by Mayekawa Sales Engineer Mr. Hiroyuki Egashira to Seapro Trade in Accra (right photos) has produced significant re-alignments and improvements to the facility's structural layout and operational orientation. Seapro Trade eventually expects to procure a customized refrigeration system from Mayekawa for efficient and optimum use.

PROJECT FACT SHEETS

MAFF-Japan Workshop on Developing Food Value Chain Technology in Africa:

- Seapro Trade has been recommended by Mayekawa Refrigeration to the Ministry of Agriculture, Fisheries & Forestry (MAFF), Japan to participate in two workshops in Accra (July & November, 2016) under the theme Developing Food Value Chain Technology in Africa .
- The workshop produced insights into economically beneficial food value chain technology development. Seapro Trade gained real time benefits into the dried-food products and horticultural market landscape in Japan with promising outlook.

SEAPRO TRADE ACCRA PROJECT SITE

The Accra North project site currently undergoing refurbishment and redesign/retooling under the supervision and consultancy of Mayekawa Refrigeration & Equator Japan LLC.
